PERSONAL PROJECTS

Real-Time Chat Application ⎘
- Developed a real-time chat application using Node.js and Socket.IO, allowing users to communicate in real-time. I designed and implemented the serverside and client-side code, using Socket.

i - Notebook ⎘
- I designed and developed the iNotebook web application using React on the front-end and MongoDB on the back-end, incorporating user authentication using JWTs and supporting real-time CRUD operations for notes.

Word Counter Website Using React ⎘
- I created a Word Counter website using React, which enables users to input text and receive a count of the words and characters. including features for converting text to lowercase, clearing text, and removing extra spaces. Additionally, I implemented a dark mode feature for a better user experience.
